

Disclaimer: *This algorithm has been developed for MD Anderson using a multidisciplinary approach considering circumstances particular to MD Anderson's specific patient population, services and structure, and clinical information. This is not intended to replace the independent medical or professional judgment of physicians or other health care providers in the context of individual clinical circumstances to determine a patient's care. This algorithm should not be used to treat pregnant women.*

---

**NOTE:**

This algorithm is currently undergoing updates by the experts of the Adult Blood Product Transfusion Reaction workgroup at the University of Texas MD Anderson Cancer Center.

Refer to internal policies and policy attachments in the [Transfusion Medicine Resources page](#) for more information.
